Halloween-themed science program for children scheduled for Oct. 19 at Crest Arts Pavilion

WILDWOOD CREST – The Borough of Wildwood Crest Recreation Department will host a free Halloween-themed science program for children in grades K-5 at the Crest Arts Pavilion on Saturday, Oct. 19, at 10 a.m.

Science and stories collide in this fun, interactive science, technology, engineering and math (STEM) program featuring the “coolest” thing in science – dry ice.

Volunteers help conduct each experiment as the whole audience participates in changing variables and making predictions. Together, program leaders and the audience will explore the “spooky” effects of frozen carbon dioxide as the audience learns about solids liquids and gases; evaporation, condensation and sublimation; physical changes; changing variables; making a hypothesis; and more.

Children are encouraged, but not required, to wear their Halloween costumes to the event. Halloween candy will be distributed by Wildwood Crest Recreation to all children in attendance.

No pre-registration is necessary for the event. For more information, call (609) 523-0202 or (609) 522-0221.
