Wildwood Crest to conduct street infrastructure work along New Jersey Avenue

The Borough of Wildwood Crest is set to conduct street infrastructure work along New Jersey Avenue from Cresse Avenue to Primrose Road. Work is scheduled to commence Thursday, Dec. 4, with completion slated for the spring of 2026.

The borough has contracted with Asphalt Paving Systems, Inc., of Hammonton, to install water mains and services and sewer mains and services and will also perform asphalt trench restoration in the aforementioned areas.

During working days, water services may need to be shut off in order to perform the work. In the event of any such shutoffs, services would be restored at the end of each work day. The borough is requesting that motorists refrain from parking on New Jersey Avenue from Cresse Avenue to Primrose Road during the ongoing construction work.

There may be occasional traffic detours during construction work. However, access to homes and businesses along New Jersey Avenue will not be restricted.

DeBlasio & Associates, P.C., the borough's engineer, will be providing construction management services for this project.

For more information, contact DeBlasio & Associates at (609) 854-3311 or the Borough of Wildwood Crest at (609) 522-5176.
