Control of Dust & Debris Letter

Block _____ **Lot** _____

Property Address _____

Contractor _____

Phone _____ **Email** _____

This letter is to confirm that the demolition site referenced is to control dust and debris, so as to be in compliance with the following:

Dust and debris control at the site shall be the responsibility of the demolition contractor during the course of the demolition. The contractor shall obtain, pay for, and transport water from its own source as required for dust control. Demolition activities may be limited by weather conditions warrant as determined by the Construction Official. Debris generated by demolition shall be confined to the site. All debris that leaves the site must be collected immediately.

If it is impossible or impractical for a contractor to provide their own adequate water source to control dust and debris, arrangements must be made for the use of a fire hydrant.

Additionally, it is hereby certified that all mechanical equipment containing Freon and related coolants (e.g. refrigerators, compressors, air conditioners) are to be removed prior to the demolition of the site.

Citations of the aforementioned requirements may result in an order to cease work immediately and the issuance of summons, for which a court appearance may be required.
